ENVIRONMENTAL POLICY

We are committed to the protection of the environment.
We strive for continual improvement of our environmental performance in the production of specialty papers and other forest products.

Beliefs
We believe that:

- Full compliance of our operations with all applicable environmental laws, regulations and other applicable standards and requirements to which we subscribe is fundamental to our business conduct
- Minimization of environmental impacts and using resources efficiently means good business
- Integration of environmental protection into business processes and decisions maximizes value to all stakeholders
- Constructive communication with stakeholders improves decision making and benefits society

Practices
We are committed to:

- Use procedures, controls and checks to ensure full compliance with all applicable environmental laws, regulations and other applicable standards and requirements to which we subscribe
- Manage environmental risks by using efficient management systems
- Develop and enforce work practices to control the environmental impact of our operations and to ensure efficient use of raw material, water and energy
- Set the framework to establish, monitor and regularly review environmental objectives and targets
- Prevent pollution by building environmental considerations into product development, facility design, operation and maintenance
- Have procedure in place to prevent, detect and respond to emergencies
- Provide employees with this policy, information and training to help protect the environment
- Conduct regular environmental audits
- Make this policy available to the public
- Report regularly on our environmental performance to senior management, the Board of Directors, shareholders, employees and the public
